PROFESSIONAL EXPERIENCE

Senior Frontend Engineer - Algo Alliance

Nov 2021 - May 2026

Dubai, United Arab Emirates | Remote | Full-time

Worked within a cross-functional team of 10-12 people, owning substantial frontend development across SaaS platforms, Web3 applications, dashboards, and internal business systems.

- Led frontend implementation across multiple products using React, Next.js, and TypeScript.
- Delivered complex dashboards, reusable components, responsive interfaces, and application workflows.
- Integrated backend APIs and managed application data using React Query and modern state-management solutions.
- Optimized application rendering, transitions, and complex interfaces to improve responsiveness and user experience.
- Improved Lighthouse performance scores from approximately 60-70 to 100 across multiple audited pages.
- Developed interactive interfaces and animation-rich experiences using GSAP.
- Implemented authentication flows, role-based interfaces, and API-driven features.
- Partnered with backend developers, designers, and product stakeholders on feature delivery.
- Mentored and trained interns from the American University in Dubai.
- Contributed to code reviews, technical decisions, and team coordination.

Technologies: React, Next.js, TypeScript, JavaScript, Tailwind CSS, React Query, Redux Toolkit, Zustand, GSAP, REST APIs, Strapi.

React Developer - Cloudtek

Mar 2021 - Sep 2021

Islamabad, Pakistan | On-site | Full-time

- Developed frontend functionality for a vehicle tracking system for Fatima Fertilizer.
- Built React applications using TypeScript and Material UI.
- Developed reusable components, forms, dashboards, and REST API integrations.
- Optimized complex forms, tables, and data visualizations.
- Collaborated with clients, designers, and team members to improve UI/UX workflows.
- Participated in team discussions and contributed to technical decisions and project delivery.
- Supported team development and mentored three junior developers.

Technologies: React.js, JavaScript, TypeScript, Material UI, REST APIs.

WordPress and Web Animation Developer - Techzir

Oct 2020 - Mar 2021

Islamabad, Pakistan

- Converted existing website themes into functional WordPress websites.
- Developed and customized e-commerce stores using WooCommerce and WordPress plugins.
- Created 2D web animations and interactive experiences using GSAP and JavaScript.
- Built custom SVG configurators and interactive design elements.
- Worked on creative web design and animation implementation.

Technologies: WordPress, WooCommerce, JavaScript, GSAP, SVG, HTML, CSS.

Frontend Developer - Phlox Solutions

Mar 2018 - Aug 2018

Islamabad, Pakistan | On-site | Full-time

- Built responsive websites and landing pages using HTML and CSS.
- Developed reusable styling patterns and basic design systems.
- Worked with vanilla CSS and SCSS to structure and maintain styles.
- Contributed to frontend implementation and visual consistency.
- Worked with PHP for some website functionality.

Technologies: HTML, CSS, SCSS, PHP.

SELECTED PRODUCTS

Solrit | Time-Audit SaaS

FOUNDER-BUILT PRODUCT

Independently designed and built a time-audit and productivity platform, owning product direction and architecture. Features include hourly tracking, planning, analytics, tasks, notes, AI summaries, AI coaching, voice interaction, MCP API, and Google Calendar integration.

https://solrit.com

Viyacor | Company OS

FULL-STACK PRODUCT

An all-in-one business management platform combining HR, payroll, CRM, invoicing, team chat, project management, and task management. Owned product architecture and full-stack development.

https://company-os-mega.vercel.app/

Sociaket | SocialFi Platform on BNB Chain

WEB3 PRODUCT

A Web3 social platform featuring social publishing, chat, voice rooms, NFT marketplace, staking, and launchpad functionality. Contributed to end-to-end product development, including architecture, frontend, backend, wallet connectivity, and on-chain interactions.

https://sociaket.vercel.app/

Clinic Management OS | Client Project

FULL-STACK PRODUCT

A clinic management platform covering patient management, appointments, prescriptions, billing, inventory, and clinic workflows. Built the product architecture and full-stack application, including AI-assisted workflows. The platform is currently used by a doctor. Monorepo with a Hono API, React dashboard, and shared packages. Role-based workflows for administrators, doctors, and counter staff, connecting prescription processing with invoicing and inventory. Stock deduction on dispensing, partial payments, and backorders.
